National Teen Driver Safety Week, October 16—22, 2022

Child Passenger Safety Week

Model T Day

Message from Executive Director, Stacey Inglis

Lt. Governor on DSC Board of Directors

Dear DSC Members and Friends,
As election season is upon us, I thought it appropriate, or perhaps timely, to share a political connection.

In 1920, at the age of 53, J. Danforth Bush was elected as the 6th Lieutenant Governor of Delaware. During his term as Lt. Governor he was also a member of Delaware Safety Council's board of directors in 1922.

As Lt. Governor, he served with Delaware's 56th Governor, William Denney from January 18, 1921 to January 20, 1925.

Joshua was born the son of George W. and Emma (Danforth) Bush in Delaware. He was baptized on December 1, 1869 at the Central Presbyterian Church in Wilmington, Delaware. Joshua's dad, George W. Bush, had inherited the family shipping business from his own father and had expanded it to include a large business in anthracite, coal, and even yellow pine lumber. The company, *George W. Bush & Sons*, eventually passed the lumber

business to his son, J. Danforth Bush's firm which was a partnership with Robert B. Rayner. Joshua Bush also took on a large role in his father's company.

Delaware Safety Council's initial efforts were industrial safety and certainly with his family lumber and coal business, Mr. Bush was intimately familiar with the need for plant safety. After George W. Bush died in 1900, his sons incorporated their coal and transportation business as the *George W. Bush & Sons Company*. J. Danforth Bush was made vice president of the company.

He was an officer in the Delaware National Guard, which was posted to New Mexico in 1916, and then served in France during World War I. At some point Joshua joined the 59th Pioneer Infantry and eventually became a Major. He was also a prominent member of the Delaware Game Protective Association.

J. Danforth Bush lived in the historic Tilton Mansion, now the University & Whist Club in the 1920's.

He raised his family there and built the Carriage House that remains on the property today. He died on December 4, 1926 of pneumonia at the age of 58.

Be Safe,

Stacey

Compression-Only CPR

Call 911

Immediately call
911 to ensure help
is on the way.

Push Hard

Place your hands
in the center of the
chest and start
compressions.

Push Fast

Compress 100 - 120
times per minute and
DON'T STOP until
help arrives.

First Aid

DEMS
SAFETY

COMPRESSION-ONLY CPR IS BETTER THAN NO CPR

So, what happens if the rescuer isn't trained in CPR or has limited PPE available? Untrained bystanders or those unwilling to provide rescue breathing can still help by providing compression-only CPR.

[Compression-only CPR](#), sometimes referred to as hands-only CPR, can be an effective alternative and it's easy to learn.

If a person collapses in front of you, **after dialing 911** to ensure medical help is on the way, follow these CPR steps:

1. Place the heels of your hands on the center of the person's chest.
2. Push fast and hard.

Continue giving compressions until trained CPR or emergency medical services providers take over, the automated external defibrillator (AED) directs you to stop while analyzing, or the person shows signs of life (e.g. responding by breathing, moving, or reacting). Note that compression-only CPR isn't appropriate or recommended for children and infants. Rescue breaths are extremely important for children and infants because cardiac arrest typically results from asphyxia (e.g. choking on foreign objects, drowning, etc.) rather than having cardiac issues.

CERTIFICATE OF RECOGNITION

Proudly presented to

Delaware Safety Council, Inc.

in recognition of your commitment to
workplace safety and health by participating in
Safe + Sound Week 2022

Delaware Safety Council was proud to participate in *SAFE + SOUND Week* promoting safety at work. There were only 6 plants in Delaware who participated in 2022 SAFE + SOUND Week:

- 1-Perdue Farms - Georgetown, DE
- 2-Ensinger Penn Fibre - Greenwood, DE
- 3-Waste Masters Solutions - New Castle, DE
- 4-Chronos Construction - Hockessin, DE
- 5-TekSolv - Newark, DE
- 6-Perdue Foods LLC - Milford, DE

CYBERSECURITY AWARENESS MONTH—OCTOBER

Since 2004, the President of the United States and Congress have declared October to be Cybersecurity Awareness Month, helping individuals protect themselves online as threats to technology and confidential data become more commonplace. The Cybersecurity and Infrastructure Security Agency (CISA) and the National Cybersecurity Alliance (NCA) lead a collaborative effort between government and industry to raise cybersecurity awareness nationally and internationally.

This year's campaign theme — *"See Yourself in Cyber"* — demonstrates that while cybersecurity may seem like a complex subject, ultimately, it's really all about people. This October will focus on the "people" part of cybersecurity, providing information and resources to help educate CISA partners and the public, and ensure all individuals and organizations make smart decisions whether on the job, at home or at school – now and in the future.

Your Role

When we say See Yourself in Cyber, we mean see yourself in cyber no matter what role you play. As an individual or consumer, take basic steps to protect your online information and privacy. Vendors and

suppliers can take ownership of their role, while protecting their brand and reputation, by putting strong cybersecurity in place at work to help prevent an incident at your location or further down the supply chain. Critical infrastructure owners and operators, you are part of a larger network of functions and systems that rely on or support critical infrastructure. Learn how your organization plays a part in ensuring cybersecurity for the larger ecosystem. Finally, there is a global need for skilled, diverse workers with technical skills to meet the cyber challenges of today and tomorrow, so find out if this is the career field for you.

4 Things You Can Do

Throughout October, CISA and NCA will highlight key action steps that everyone should take:

- Enable Multi-Factor Authentication
- Use Strong Passwords
- Recognize and Report Phishing
- Update Your Software

DELAWARE

NETWORKING STATION

DELAWARE STATE
CHAMBER OF COMMERCE

Delaware Safety Council and its SmartDrive Teen Safe Driving Program, made an appearance at the 2022 *Delaware Networking Station* event hosted by the [Delaware State Chamber](#) at the Chase Center on Thursday, September 22nd.

Delaware State Chamber President, Mike Quaranta participated in the SmartDrive Impaired Driving simulation game wearing the impaired goggles.

Hundreds of attendees learned about various businesses throughout the state and visited vendors for information and prizes. Delaware Safety Council and SmartDrive test drove their new tradeshow materials at booths 67 & 68.

Our next outing with DSCC is in Washington, D.C. [Taste of Delaware](#) on December 6th held in honor of *Delaware Day*, in the senate building hosted in part by Senator Coons to show off Delaware offerings.

Delaware State Chamber President, Mike Quaranta

Attendees and fellow exhibitors visited Booths 67 & 68 to learn about safe driving, workplace safety programs, and CPR classes. Delaware Safety Council Executive Director, Stacey Inglis, Defensive Driving Program Manager, April Garr, and Program Coordinator, Torquoise Gilbert attended.

Fellow exhibitors Carey, from West End Neighborhood House and John of Fulton Bank participated at our booth.

Model T Day – October 1, 2022

On October 1, 1908, the first Model T car rolled out of the Ford factory on Piquette Avenue in Detroit, Michigan. The car was arguably the first automobile in the world that ordinary middle-class folks could afford. America's working-class warmed up to Henry Ford's creation and the rest, as they say, is history.

Modern cars began to be manufactured in the late 1800s in Germany and slowly made their way into America. However, most of these vehicles were simply out of reach of ordinary American folks. That was until 1908.

Determined to build an automobile for ordinary Americans, Henry Ford assembled a team of engineers and technicians in January 1907. On October 1, 1908, the team

successfully launched a mass-produced car that most Americans could buy — the Model T.

The Ford Model T was a left-hand drive vehicle with an enclosed four cylinder engine. Its body was fashioned out of vanadium alloy steel, giving it a sturdy exterior. A generous ground clearance endeared it to rural drivers in America. For the first time, Ford had made a car with all parts built in-house.

The car became so popular that soon Ford Motor Company built a new 60-acre factory in Highland Park to manufacture Model Ts.

The factory was arguably the biggest mass-production facility in those days. Henry Ford created a moving assembly line for the manufacturing process that utilized

conveyor belts — a first in automobile production at that time. In six months, a Model T began to be made in a little less than six hours — significantly less than the nearly 10 hours needed initially.

Ford Crafts Affordable Car

Henry Ford assembles a team of engineers and technicians in a small factory on Piquette Avenue in Detroit, Michigan, with a target of creating a car that ordinary Americans can buy.

The Last Model T Rolled Out

Changes in customers' tastes and preferences bring the Model T era to an end, and the last car moved out of the assembly line on May 26, 1927.

Sept. 10 & 11, 2022

As a recipient of a [Mushroom Festival](#) grant for safe teen driving, Delaware Safety Council happily attended this year's annual festival in September. The weather was more appropriate for mushrooms than attendees, but participants weathered the rain drops and enjoyed the day.

We promoted our [SmartDrive CLICK-4-Life](#) campaign supporting safe teen driving by reminding them to buckle up, every trip and every time! Schools and students are urged to take the pledge to do exactly that.

IT'S THE "PRINCIPAL" OF THE THING

Principal, Dr. Kiljowski of Caesar Rodney High School, Principal, Lisa Brewington of William Penn High School, and Elizabeth Inman-Moran, Admissions Coordinator at Cab Calloway School of the Arts joined in to promote [CLICK-4-Life](#) 2022 and **Child Passenger Safety Week!**

Passenger seatbelt usage is only 48%, we need to save teen lives. Reminding everyone to wear their seatbelt every time is part of the [pledge](#).

Of the four kick-off schools, Caesar Rodney has the highest student pledges so far!

Elizabeth Inman-Moran Admissions Coordinator at Cab Calloway School of the Arts

Principal, Dr. Kiljowski of Caesar Rodney High School

William Penn Principal, Lisa Brewington

Grotto Pizza®
the legendary taste®

Grotto Pizza partnered with [CLICK-4-Life](#) by offering a token for a FREE slice of pizza to the students who took selfies and the pledge to [CLICK-4-Life](#).
